

**Course outline :**  
**Amplifying marketing skills  
with generative AI**

## Overview

This intensive, hands-on training course, available in 3, 7 or 10-hour formats, propels you into the concrete use of AI tools to amplify your marketing and communication strategies. After a targeted introduction to specialized AI tools for digital marketing and content creation, you'll directly experience their use through practical exercises based on real-life scenarios. The focus is on the immediate application of what you learn to your day-to-day challenges: content creation, data analysis, campaign personalization and engagement optimization. You'll leave with a personalized toolbox and the confidence to integrate AI into your marketing and communications strategies, significantly increasing your creative productivity and the impact of your campaigns..

## Who should attend

This training course is aimed at marketing and communication professionals who want to understand and exploit artificial intelligence in their missions:

- Marketing and communications managers
- Communications managers
- Product and brand managers
- Social network and community managers
- Content creators and writers
- Digital marketing managers
- Public relations officers

## Key information

- **Duration:** 3, 7 or 10 hours (see course outline below)
- **Level:** Intermediate
- **Training series:** Skills enhancement
- **Languages:** French or English
- **Delivery format:** Virtual or Face-to-face
- **Delivery mode :** Synchronous, trainer-controlled
- **Session type:** Private group training
- **Group size:** 8 to 16 participants
- **Possible certification:** AI Mastery

## Prerequisites

- - AI Awareness training (Ideally)

## Overall training objectives

- **Identifying the right generative AI tools**  
Identify relevant AI tools, their key functionalities, appropriate contexts of use, and associated best practices.
- **Understanding how to use generative AI**  
Understand AI tools, interpret their results, distinguish appropriate use cases and classify the forms of assistance offered by AI in the workplace.
- **Applying good prompting practices in tools**  
Use AI tools independently, apply best practices, adapt prompts according to needs and daily work tasks.
- **Analyze and assess the quality of results**  
Evaluate the quality, relevance and effectiveness of AI tools, as well as diagnose problems and justify the use or non-use of AI depending on the situation.

# Skills acquired

**At the end of this course, participants will be able to:**

## **Remember**

- Identify the main AI tools relevant to their professional context
- Name the key functionalities of each tool presented
- Recognize the situations conducive to the use of each tool
- List best practices for using AI tools

## **Understand**

- Explain the general operation of the AI tools presented
- Interpret the results produced by AI tools
- Distinguish the appropriate use cases for each tool
- Classify the different types of assistance that AI can bring to their work

## **Apply**

- Use the AI tools presented independently
- Demonstrate correct use of the main functionalities
- Implement good AI interaction practices
- Adapt prompts and queries to specific needs
- Perform professional tasks with AI assistance

## **Analyze**

- Examine the quality of results produced by AI
- Diagnose common problems in the use of tools
- Differentiate between situations where AI is relevant and those where it is not
- Analyze the effectiveness of different approaches to tool use

## **Evaluate**

- Assess the suitability of an AI tool for a given task
- Judge the quality and reliability of the outputs generated
- Measure the efficiency gains brought about by the use of AI
- Justify the choice of whether or not to use AI for specific tasks

## Create

- Develop customized prompts tailored to their needs
- Build their own customized AI toolbox
- Generate innovative solutions by combining different AI tools

# Assessment and certification

## **CERTIFICATE OF ATTENDANCE**

A certificate of attendance is systematically issued to each participant at the end of the course. This official document is sent to you directly after the trainer has validated your attendance.

## **AI MASTERY CERTIFICATION BADGE**

To make the most of your new skills, we offer you the opportunity to earn our '**AI Mastery**' certification badge. This certification is obtained by validating an online test that evaluates your understanding of the key concepts covered during the training course. The badge is issued by Moov AI as soon as you achieve a minimum score of 75% on the validation test. This certification provides official proof of your mastery of the fundamentals of AI, and can be shared on your professional networks..

## Detailed course outline

3-hour version - Focus on core competencies

### Module: Introduction to LLMs and Generative AI (30mins)

- LLM definition and fundamentals
- Architecture and basic operation
- Model types and their characteristics
- Current capabilities and limitations
- Key concepts: tokens, embeddings, prompts
- Impact on different business sectors

### Module: Security and confidentiality when using LLMs (30mins)

- Understanding confidentiality issues
- Good security practices
- Ethical communication with AI

### Module: Producing text with an LLM (60mins)

- Basic principles of prompt engineering
- Content generation techniques
- Structure and format of effective prompts
- Tone and style control
- Optimizing results
- Best practices and pitfalls to avoid

### Module: Analyzing and synthesizing text with an LLM (60mins)

- Text analysis and information extraction techniques
- Key information extraction
- Structural analysis
- Pattern identification
- Content classification
- Comparative analysis

- Summary structuring
- Adaptable synthesis levels
- Accuracy validation

## 7-hour version - Main program

*Includes all modules of version 3h, plus :*

### **Module: Transforming and formatting text with LLM (30mins)**

- Rewriting techniques and reformulation
- Adapting style and language level
- Formatting for different media
- Conversion between formats
- Document structuring
- Checking and improving quality

### **Module: Translating and localizing with AI (30mins)**

- Principles of machine translation
- Cultural adaptation and localization
- Preserving context and meaning
- Quality control
- Idiomatic expression management

### **Module: Analyzing visuals with LLM (30mins)**

- Image recognition
- Visual content description and analysis
- Information extraction
- Image classification
- Object and scene detection
- Layout analysis

### **Module: Analyzing data with AI (30mins)**

- Data preparation and cleaning

- Statistical analysis techniques
- Data visualization
- Interpretation of results
- Trend identification
- Data-driven recommendations

## **Module: Search (web and other) with the help of LLMs (30mins)**

- Advanced search techniques
- Source validation
- Limits to LLM search capabilities

## **Module: Learning with the help of an LLM (30mins)**

- Personalized learning
- Creating learning paths
- Self-assessment techniques
- Content adaptation
- Progress monitoring

## **Module: Ideation with LLM (30mins)**

- Idea generation techniques
- Stimulating creativity
- Concept exploration
- Development of alternatives
- Idea evaluation
- Concept refinement

## 10-hour version - Full program

*Includes all modules of version 7h, plus :*

### **Module: Visual creations with different AI models (90mins)**

- Principles of image generation
- Visual prompt engineering techniques
- Styles and variations
- Editing and retouching
- Composition and design
- Style and reference consistency
- Practical applications

### **Module: Sentiment analysis with AI (30mins)**

- Principles of sentiment analysis
- Emotion detection
- Tone analysis
- Opinion classification
- Practical applications

### **Module: Preparing presentations with AI (30mins)**

- Content structure and organization
- Creating detailed plans
- Generation of engaging content
- Design and visual aspects
